Adam Ordway

New York Metropolitan Area | 423-737-9889 | agordway@gmail.com

Experience

AT&T | MIDDLETOWN NEW JERSEY

Professional Member of Technical Staff	3/2021 – PRESENT
Senior-Specialist Software Engineer	5/2019 – 3/2021
Specialist Software Engineer	6/2018 – 5/2019

Responsibilities:
- Full-stack development lead for the Open Test Framework (OTF) application.
- Create and assign user stories to improve OTF's performance and functionality for clients.
- Production code deployments and application support.
- Mentor and provide performance feedback for Technology Development Program team members.

Achievements:
- Designed and developed OTF, a network testing & automation platform, from the ground up. This has allowed AT&T to save time and money by automating manual networking operations.
- Architected and deployed the Azure infrastructure for OTF's development and production environments to meet AT&T's goal of migrating to public cloud from on-premises data centers.
- Automated OTF's CI/CD with Azure Pipelines.

TECHNOLOGY FOR ENERGY CORP. | KNOXVILLE TENNESSEE

Software Developer	8/2017 – 5/2018
Software Developer Intern	5/2017 – 8/2017

Responsibilities:
- Design and develop data management websites using WordPress, Laravel, JavaScript, and AngularJS.

SELF EMPLOYED

Web Developer	3/2014 – 5/2018

Responsibilities:
- Design and develop client's websites for their businesses and their online e-commerce store.
